## PERSONAL PROJECTS

### Lizzie VSCode Theme (2019 – Present) [↗](#)

- Created a minimal dark theme for VSCode published to Visual Studio Marketplace. The main intention creating this theme is to have a comfortable and simple color scheme which could help us to concentrate making developers more productive avoiding distractions with cluttered themes.

### prscribeiro.com - Personal Website (2019 – Present) [↗](#)

- Improved the ammount of visits in my personal website by creating a visually appealing and fast website where I can show off some of my technical skills and personal projects I've been working on lately.

### Pause...Drink! (2019 – Present) [↗](#)

- Contributed to make the fun game built and idealized by a partner called Phillip Sole internationally known by translating the whole game challenges and interface to Portuguese, also reviewing the app features gathered with a team of contributors from all around the world with the intention to make the app even more fun to play.

### Periodicus (2019 – Present) [↗](#)

- This app was created to help students and teachers in the process of learning/teaching Chemistry with a dynamic periodic table. The project was created using React for the frontend and the next version is being escaled to use Firebase for the backend.

### TRINTA (2019 – Present)

- TRINTA is an app being created to help people to reach their goals by following the mindsef of consistency, inspired by the #100DaysOfCode movement. The app is being built with Node & MongoDB in the backend. For the frontend, we're using the React framework.

### ALL (2019 – Present)

- All is an app designed to help people in need(LGBTQ+ & moms solo) to find companies that are friendly to them. Helping people to find companies that share a culture of inclusion and non-discrimination. The application is being built with Node and React.
